# Parker Throneberry

Austin, TX | parkert.dev | parkerthroneberry@gmail.com | linkedin.com/in/pht1207 | Full CV

## WORK EXPERIENCE

**Pushnami** | *Software Developer* | Austin, TX | 2026 - Present

- Built a configurable popunder that lifted site revenue by **2% (about $320K annualized)**.
- Fixed user misclassification in a legacy system, recovering **$168,000 in annual revenue**.
- Validated and removed a third-party API, saving **$102,000 annually**.
- Cut database calls by 86%, saving **$40,000 annually** in **AWS** costs.
- Automated flagged domain replacement to keep services available.

**Paycom** | *Software Developer* | Irving, TX | Nov 2024 - 2026

- Built and maintained Scheduling with **React, PHP, and MySQL** for **37,500+ organizations**.
- Built **iWant**, a **GraphQL**-backed LLM for scheduling that raised user satisfaction by **~30%**.
- Built backend services and external **REST APIs** for client integrations using **C# and PHP**.
- Helped migrate scheduling out of a monolith, expanded test coverage, and mentored interns.

**Printforgers** | *Software Developer (Independent Project)* | printforgers.com | Sep 2023 - Present

- Built a 3D printing platform with **TypeScript, React, Node.js, and PostgreSQL**.
- Automated model previews and quotes; stored order snapshots for auditable checkout.
- Containerized services with **Docker** and automated deployments with **GitLab CI/CD**.

## TECHNICAL PROJECTS

**PocketShare** | pocketshare.io

- Built a real Android phone rental marketplace with **TypeScript, Fastify, and PostgreSQL**.
- Shipped live browser controls, an **ADB** relay for Android Studio, and **CLI** and **MCP** automation.
- Built per-minute billing with spending caps and automated phone wipes between rentals.

**HostForge** | hostforge.org

- Automated server provisioning after live **Stripe** checkout using **TypeScript** and **Pelican**.
- Built a **React** dashboard for live console access, file management, backups, and restores.

**Tools For Free** | toolsforfree.app

- Built a **Next.js** file converter with local browser tools and isolated **Docker** engines.
- Added support for **1,000+ file conversions** across documents, images, audio, and video.

**Homelab Infrastructure**

- Built a **Proxmox** homelab with **Nginx** routing, internal DNS, and **Grafana** monitoring.

## TECHNICAL SKILLS

**Languages and APIs:** TypeScript, JavaScript, Go, PHP, C#, SQL, GraphQL, REST
**Stack:** React, Node.js, AWS, Terraform, Docker, GitLab CI/CD, PostgreSQL, MySQL, DynamoDB

## EDUCATION

**University of North Texas at Dallas** | B.S. in Information Technology | 2024
